WELCOME TO THE 2026 LINEUP OF ALTA BEEF SIRES.

We're committed to **Create Value, Build Trust, and Deliver Results** with every recommendation we make. By combining practical selection tools with advanced data and technology, we support producers in making informed, economically sound genetic decisions.

The year 2025 will be remembered as extraordinary across the beef industry. Every sector—from purebred sales to commercial calves—experienced historic market strength. The value generated by thoughtful breeding and management decisions has never been more evident.

Recent years have further reinforced several key lessons:

FIRST, consumers are clearly expressing their expectations through their purchasing behavior. They want a safe, high-quality beef product, whether enjoyed at home, in grocery stores, or at restaurants. Demand for a wholesome, nutritious eating experience continues to deliver value throughout the supply chain, including to the producers who make it possible.

SECOND, genetics now play an even greater role in capturing value. Commercial cattlemen seek bulls and females that excel in economically relevant traits, while feeders prioritize cattle that stay healthy, gain efficiently, and meet the requirements of value-added programs.

THIRD, artificial insemination—our industry's original AI—has never been more impactful. Time after time, AI-sired cattle outperform and outsell those bred by natural service. Likewise, females bred to AI sires consistently command higher premiums. Artificial insemination remains one of the most powerful tools available for improving herd performance and profitability.

We invite you to review the sires featured in our directory and identify those that best align with your breeding objectives. Our team of professional representatives is available to assist with sire selection, synchronization protocols, and the integration of a successful AI program within your operation.

As we look ahead to 2026, continued strong beef demand and historically low cow numbers create significant opportunity. Now is an ideal time to invest in superior genetics that can advance your program and enhance long-term returns. At Alta, we stand ready to put our knowledge to work for you.

Thank you for your interest in all that Alta has to offer. We're proud to be part of the URUS family, united by the mission to create **"Better Cows for a Better World."**

Congratulations!
Eldon & Kathy Starr
BULL BARN GENETICS STAPLETON, NE

ARSBC 2025: AI Service Technician Award

For nearly 60 years, Eldon has been a proponent of the use of AI and the added value it brings to not only purebred herds, but also in the commercial industry.

Eldon was one of the early adopters of importing semen from the exotic breeds of Europe. He experienced the good and bad attributes of most of the new breeds to the US firsthand. This experience allowed him to be a valuable resource for his customers and cattlemen across the US as they sought his advice on breeding and genetics.

Eldon provides a valuable service to his customers in the Sandhills as the largest source of liquid nitrogen delivery in the Sandhills. He currently services over six hundred tanks on his route. Without this service, many would forgo breeding AI.

Eldon and Kathy have been a true team as they built their company, Bull Barn Genetics. Eldon is often called for his opinion on bulls to be used in numerous environments. His vast knowledge of breeds and cattle is unequalled in the industry. Because of their knowledge and service, Bull Barn Genetics has earned top sales awards from numerous AI companies.

Eldon and Kathy Starr have been proponents of AI for almost 60 years, serving customers throughout the Sandhills. In 2026, they will be turning their business over to their daughter-in-law, RaLynn and grandson, Jaxton, to continue its valuable service.

\$RANCH®

Building Better Cows from the Ground Up

The \$RANCH® index improves fertility, feed efficiency, longevity and weaning weight. It predicts annual profit from a bull's daughters so you can build cows that breed back, stay longer and raise bigger calves while eating less feed.

FERTILITY FIRST: Calving every year increases revenue and lowers replacement costs.

MODERATE SIZE: Smaller cows reduce feed costs and allow higher stocking rates.

PRACTICAL GROWTH: Produces heavier calves without sacrificing efficiency.

The result is more fertile, efficient and profitable herds.

\$FEEDER®

Genetics That Pay in the Feedlot

The \$FEEDER® index ranks bulls for feedlot performance and carcass value. It is ideal for retained ownership or marketing on value-based grids.

FEED EFFICIENCY: Cattle finish faster on less feed.

GAIN AND CARCASS QUALITY: High average daily gain and Prime or Choice grading earn grid premiums.

BALANCED YIELD: Ribeye, muscle and fat cover are optimized for top carcass weights without excess trim.

The outcome is faster growth, better carcasses and more profit.

STABILIZER % RANK (12-05-2025)

	AVG	TOP 25%	TOP 1%
\$PROFIT®	\$9,256	\$15,035	\$29,200
\$RANCH®	\$42	\$81	\$177
\$FEEDER®	\$97	\$112	\$221

**TO LEARN MORE ABOUT LEACHMAN INDEXES, VISIT:
WWW.LEACHMAN.COM • 970-568-3983**

THE FOUNDATION OF BETTER COWS FOR A BETTER WORLD

\$PROFIT®

One Number for Total Return

The \$PROFIT® index combines 22 traits including reproduction, growth, carcass merit and feed efficiency into one score. It maximizes net return from birth to harvest.

COWS THAT WORK: Fertile, long-lived, efficient females.

STEERS THAT PAY: Fast gain, high marbling, and strong grid returns.

WHY USE ALL THREE?

\$RANCH® builds the factory with fertile, efficient cows.

\$FEEDER® improves the output with high-performing feeder calves.

\$PROFIT® balances maternal and terminal traits for the highest economic return.

BLENDED SEMEN AVAILABLE

Combine Your Most Desirable Traits

Blended semen combines multiple sires in one unit to improve conception and deliver more uniform calves.

HIGHER CONCEPTION RATES: Multiple sires reduce fertility risk and often improve results in large pasture groups or timed A.I. programs.

GREATER GENETIC CONSISTENCY: Similar genetic targets produce uniform birth weights, gains, mature size, and carcass quality for better marketability.

LOWER GENETIC RISK: Spreads risk across several sires to avoid outliers in birth weight, performance, or phenotype.

ACCESS TO ELITE BULLS: Makes top genetics available even when individual inventory is limited.

Blended semen delivers dependable conception, predictable performance and superior calf crops.

LEACHMAN INDEXES + BLENDED SEMEN = MORE PROFIT, MORE PREDICTABILITY, BETTER CATTLE.

HEAT DETECTION & TAI

For best results perform AI 12 ± 2 hr after detection of estrus.
Use of estrus detection aids (EDA) is highly recommended.

Select Synch+CIDR® & TAI

Heat detect & AI days 7 to 10 and TAI with GnRH all non-responders 72 - 84 hr after PG.

7-day CO-Synch+CIDR® & Split-TAI

Perform first TAI 54 ± 2 hr after PG in estrous heifers. Second TAI with GnRH only in non-estrous heifers.

MGA®-PG & TAI

Heat detect & AI days 33 to 36 and TAI with GnRH all non-responders 72 - 84 hr after PG.

14-day CIDR®-PG & TAI

Heat detect & AI days 30 to 33 and TAI with GnRH all non-responders 72 ± 2 hr after PG.

FIXED-TIME AI

Time for Fixed-time AI (TAI) should be considered as the approximate average time of insemination based on the number of females to inseminate, labor, and facilities.

5-day CO-Synch+CIDR®

Perform TAI at with GnRH 60 ± 4 hr after CIDR removal. Two injections of PG 8 ± 2 hr apart are required for this protocol.

7-day CO-Synch+CIDR®

Perform TAI with GnRH at 54 ± 2 hr after PG.

MGA®-PG & TAI

Perform TAI with GnRH at 72 ± 2 hr after PG.

14-day CIDR®-PG & TAI

Perform TAI with GnRH at 66 ± 2 hr after PG.

7&7 Synch

Perform TAI with GnRH at 54 ± 2 hr after CIDR removal.

EDA

Aervoe™, AIPaint™, Detect-her™, Estroject™, Kamar™, Mark-her™, Paintstik™, Quick Shot™, Tell Tail™, Twist-Stik™

HEAT DETECTION & TAI

For best results perform AI 12 ± 2 hr after detection of estrus.
Use of estrus detection aids (EDA) is highly recommended.

Select Synch & TAI

Heat detect & AI days 6 to 10 and TAI with GnRH all non-responders 72 - 84 hr after PG.

Select Synch+CIDR® & TAI

Heat detect & AI days 7 to 10 and TAI with GnRH all non-responders 72 - 84 hr after PG.

PG 6-day CIDR® & TAI

Heat detect & AI days 0 to 3. Insert CIDR + GnRH to non-responders, heat detect & AI days 9 to 12. TAI with GnRH non-responders 72 - 84 hr after PG and CIDR removal.
Protocol may be used in heifers.

7-day CO-Synch+CIDR® & Split-TAI

Perform first TAI 66 ± 2 hr after PG in estrous cows. Second TAI with GnRH only in non-estrous cows.

FIXED-TIME AI

Time for Fixed-time AI (TAI) should be considered as the approximate average time of insemination based on the number of females to inseminate, labor, and facilities.

7-day CO-Synch+CIDR®

Perform TAI with GnRH at 60 to 66 hr after PG.

5-day CO-Synch+CIDR®

Perform TAI with GnRH at 72 ± 2 hr after CIDR removal. Two injections of PG 8 ± 2 hr apart are required for this protocol.

7&7 Synch

Perform TAI with GnRH at 66 ± 2 hr after CIDR removal.

Bos indicus PG 5-day+CIDR®

Perform TAI with GnRH at 66 ± 2 hr after CIDR removal.

EDA

Aervoe™, AIPaint™, Detect-her™, Estrotect™, Kamar™, Mark-her™, Paintstik™, Quick Shot™, Tell Tail™, Twist-Stik™

For additional synchronization protocols visit BeefRepro.org
Use of sexed semen can result in conception rates that are decreased compared to conventional semen used in the same situation

HEAT DETECTION

Sexed semen can be used on any female observed in estrus (heat) and following synchronization with any protocol on the Cow or Heifer Protocol Sheet.

For best results with sexed semen perform AI 16 to 22 hr after detecting female in estrus.

Use of estrus detection aids (EDA) is highly recommended.

FIXED-TIME AI

Time for Fixed-time AI (TAI) should be considered as the approximate average time of insemination based on the number of females to inseminate, labor, and facilities.

To optimize pregnancy success, it is recommended to use sexed semen on females that have exhibited estrus before TAI and conventional semen on females that have not exhibited estrus.

HEIFERS ONLY

7-day CO-Synch+CIDR®

Perform TAI with GnRH at 72 ± 2 hr after PG.

COWS

7&7 Synch

Perform TAI with GnRH at 66 ± 2 hr after CIDR removal. All cows can also be inseminated with either sexed or conventional semen.

HEIFERS ONLY

PG-7 7-day CO-Synch+CIDR®

Perform TAI with GnRH 72 ± 2 hr after second PG. All heifers can also be inseminated with either sexed or conventional semen.

SPLIT-TIME AI (STAI)

Perform first TAI 66 ± 2 hr after PG in estrous females. GnRH administered at second TAI only in non-estrous females. Females detected in estrus by first or second TAI receive sexed semen.

Females not in estrus receive conventional semen at second TAI.

HEIFERS ONLY

COLOSTRAL FAT ENERGY

Who We Are?

Dubas Equipment LLC Fullerton, NE

Selling what works best since 1993. Gene Dubas purchased his first Silencer squeeze chute because he thought it was the best chute out there. Not just because of its superior build quality, but because of the comfort and safety it provides for his animals. Fast forward and you'll find the same to be true. We only sell products that we have used and come to trust on our own cattle. We've sold, delivered, and installed equipment quite literally all around the world.

- 20+ Years as a top dealer for Moly MFG.
- Black and Red Angus Ranchers

We offer the best cattle handling products on the market. From the new wide body commercial pro chute to the remote turret gate. We sell the products that make work easier for you and causes far less stress on your animals. We believe in these products because we use this equipment ourselves.

ADDITIONAL INFORMATION

North American Beef Team	2
Territory Sales Managers	3
Alta Beef Representatives	4
Top Angus Sires	46
Beef Heifer Protocol	60
Beef Cow Protocol	61
Sexed Semen Protocol	62

Identifies sires that have been widely used in multiple herds.

Identifies Angus, Red Angus, and SimAngus sires that genetically excel in growth and carcass value potential. Minimum EPDs:
Angus: +.61 MARB, +160 \$B | **SimAngus:** +.48 MARB, +86 TI
Red Angus: ADG, MARB, REA and CW in Top 30%

Identifies Angus sires with genetic potential for added carcass value.
 Minimum Marbling EPD (MARB) of +0.65 and Grid Value Index (\$G) of +55 or higher

HOW TO PLACE AN ORDER

Visit altabeef.com any time to order your elite sires online!

Or call 1-866-266-2582 | Monday - Friday 8:00 – 4:30 MT
