

YOUR PERFECT DAIRY BUSINESS INTERNSHIP

Develop your consultative sales skills and build your portfolio of large, progressive dairy accounts.

Work with our current network of sales managers to implement customized solutions focused in any or all of these key management areas.

GENETIC CONSULTING

Implement customized genetic plans, optimize herd inventory management with conventional, sexed, and beef x dairy strategies, and prove genetic progress through assessment reports from DairyComp and Alta BLUE LINK.

REPRODUCTIVE MANAGEMENT

Develop your knowledge of advanced reproduction protocols, understand and sell the benefits of the Alta COW WATCH activity monitor system for improved repro results, and consult on management strategies using DairyComp data.

CALF MANAGEMENT

Use research data to explore best practices for managing the health and productivity of neonatal calves, including colostrum protocols at birth and as part of post-day 1 feeding programs.

TRANSITION & FRESH COW MANAGEMENT

Help producers get their cows off to the best start after calving. Use DairyComp data to consult on fresh cow protocols utilizing Alta COW WATCH and RumiLife CAL24.

ALTA COW WATCH ACTIVITY MONITOR TECHNOLOGY

Make informed decisions that impact your herd's profitability when you pair advanced Alta COW WATCH technology with expert support and consultation from your trusted Alta advisor.
