

# CUSTOMIZE YOUR INTERNSHIP

for the ultimate progressive dairy experience

"My internship with Alta Genetics is easily one of the best experiences I have had. Not only did I get the practice and repetition breeding cows, I was able to work with synch programs, use DairyComp, and analyze reproductive performance of different farms throughout the summer. I really was able to gain experience with all aspects of a successful reproductive program on a dairy farm and I feel like this internship has more than prepared me to begin my career in this industry!"

**Emma Brenengen**, *Penn State University*  
*Previous Alta Reproductive Management Intern and Current Alta Technician Team Leader*

"This summer I got to experience the dairy industry in the Northwest US. I truly enjoyed getting to work with the amazing employees within Alta as well as the large progressive dairy farmers. Getting to experience large scale progressive dairy farming was definitely my favorite part of the summer, especially seeing how reproduction protocols function at such high levels. This summer I also learned that people buy products and services from people through positive relationships. This summer was an experience of a lifetime and I am grateful for the opportunity that Alta provided me."

**Matthew Lansing**, *Iowa State University*  
*Alta ADVANTAGE Intern*

"My internship with VAS provided me with the unique opportunity to be a part of a team whose main focus is to move dairies forward in efficiency and consistency. From hands-on involvement with the development of new technologies and tools, to insightful training with the existing programs, this internship offers a great view into the future of dairy and progressive thinking. I am excited to continue working for such a diverse company and support the success of the dairy industry."

**Jennifer Callanan**, *Washington State University*  
*Previous VAS Intern and Current VAS Software Support Specialist*

"My internship with Alta Genetics reaffirmed my passion for pursuing a career within Marketing Communications in the dairy industry. Throughout the summer, I was treated like a full-time employee, engaged in several key projects and asked to help move the organization forward. I truly enjoyed the self-starting yet relaxed culture of Alta Genetics. Each day, walking onto a farm or into the office, I felt like I was being greeted by family. It truly was the best internship I could've asked for going into my last year of college."

**Kati Kindschuh**, *University of Wisconsin-River Falls*  
*Alta Marketing & Communications Intern*

As sister companies within Koepon Holding, we join forces to support modern, progressive dairy farmers worldwide.

# BUILD YOUR PERFECT INTERNSHIP

Choose from one or any combination of the following focus areas to create a rewarding internship with your skills and career goals in mind.

## Genetic Consulting

Travel within a multi-state region to large, progressive partner dairies or work with source herds for Alta's product development and PEAK programs. Implement customized genetic plans, assist with sire procurement, provide performance reports using DairyComp, assist with Holstein Association SET evaluations and select and prepare daughters for professional photography.

## Reproductive Management

Develop your understanding of advanced herd reproductive strategies with thorough hands-on experience. Assist with pregnancy diagnosis, artificial insemination, tail striping, heat detection and monitoring herd reproductive performance using DairyComp in herds averaging 2,000 cows.

## Sales

Work with our current network of sales managers to build your own portfolio of accounts. Provide genetic, reproductive and calf management consulting advice, and develop customized solutions for current and prospect progressive dairy farms.

## Marketing & Training

Enhance your skills in all areas of marketing, communications and training by promoting the Koepon companies globally through online, print and video communication pieces.

## Calf Management

Work with the SCCL team on new research projects to advance the health and productivity of neonatal calves. Or use your sales and marketing skills to promote SCCL products through trade show involvement and producer and vet meetings.

## Dairy Herd Management Software

Develop your understanding on current VAS products and software including DairyComp, FeedComp, ParlorComp, and more. Increase your knowledge, awareness and efficiency with dairy herd management software and practical application in every day, on-farm use.

**IF YOU HAVE A PASSION FOR THE DAIRY INDUSTRY AND HELPING PROGRESSIVE DAIRY PRODUCERS, WE WANT TO WORK WITH YOU!**
